BROWSER APPLICATION · 2025 – PRESENT

SPLITFORGE

Twenty-seven tools. Zero uploads.

> Twenty-seven CSV and Excel tools that process files in the browser. The file's contents are not uploaded, because the product has no endpoint to receive them.

Role	Founder, sole developer
Period	2025 – present
Stack	JavaScript · React · Vite · Web Workers · Streams API
Live	splitforge.app

EVIDENCE

- ■ Live product at splitforge.app — Verified
- ■ 27 tools, client-side processing (product copy) — Verified
- ■ No upload endpoint by design (product copy) — Verified
- ■ Stack: JavaScript and React, built with Vite (product repository package.json, read 2026-11-17) — Verified
- ☐ My own large-file benchmark and memory figures — Pending
- ■ Usage or revenue figures — Not claimed

FROM THE CASE STUDY · RESULT

A toolkit for files beyond Excel's row limit that processes them in the browser: file contents are not uploaded, and no server processes them. Free tier of 25 operations a month; a Business tier for heavier use.
